I.T. Needs Survey Package (Gold)

Product Duration

TBA (evaluated at each request)

Time

09.30 – 16.30 each day, working hours Mon to Fri

Product Description

Basic Look at I.T. and create a small report about where it is and things to consider. This can take anything from half a day to longer depending and where you are just now with your I.T. usage then we look at stating where improvements can be made in your current usage and if asked can go and get some tenders to carry out the improvements. We then look into the future to see what is coming up in the world of tech and where you as a business might be then. How you could work smarter at that point and tap into all the latest emerging tech. **(This can take a few visits and offsite work that creates the tenders and research into what you could be using. This is the most comprehensive package and will require a number of visits and offsite work. With a possible meeting with third-party suppliers to make sure you are tapping into the latest tech and allowing for future growth.)**

Product Benefits

The benefits of this product are:

- ∞ Check on I.T. currently in place
- ∞ Look at potential issues just now
- ∞ Look at potential issues that may arise in the future
- ∞ Report for your consideration
- ∞ Can be project managed for the installation of new tech
- ∞ We would use or contacts in the I.T. tech world and suppliers to price the best setup for your future use
- ∞ This is a comprehensive option and will save you spending large amounts of expense on tech in the future by possibly phasing in the route into the latest tech.
- ∞ Peace of mind about your I.T. and how you are using it now and into the future.
- ∞ Takes away the worry of having a large I.T. bill in the future just to allow you to catch up. Early action allows planning out large expenses.

Product Objectives

This is the most comprehensive survey and will give you a plan, actions and tenders for your consideration. As well as looking into the future to check that you are keeping up to date. Also can be escalated to allow for us to project manage the supply and install of all the new kit.

Prerequisites

Using any I.T. for business at present.

Cost

Priced per application, dependant on what work is required.

Locations

In-House at clients premises, by prior arrangement.

Helping you use Technology into the future.....
